1 INT. COURTROOM HALL**DAY**

A single shaft of light shines down onto a lone figure leaving the rest of the hall in darkness. He is an older man wearing a suit, sitting behind a judges style oak panelled bench. He looks up at the assembled unseen crowd in darkness before him.

LONE FIGURE

Ladies and Gentlemen, I've invited you here today announce the findings of this inquiry. Now this is an announcement, not a press conference, therefore there will be no questions. A complete transcript of the investigation is being prepared for publication on March the 1st. At that time I will hold a full scale press conference.

After nearly 11 months of investigation, followed by 15 weeks of hearings, it's the conclusion of this inquiry that deaths of 267 people in the village of Ashbourne was an accident, caused by a collision between a high speed freight train, and a stationary lorry. The derailment and fires which followed ruptured a number of toxic chemical tankers, resulting in many fatalities in the immediate area.

It is our further conclusion that the continuing military quarantine of the area is entirely justified, and should continue.

This inquiry wishes to emphasize that it has seen no evidence of any cover-up, nor any attempt to hide the facts.

No evidence whatsoever.

Now it is our hope that this will put an end to the kind of irresponsible and exploitive speculation conducted by the press in recent months. As I've said the complete text of the hearings which provides the basis for this inquiry's findings will be published on March the 1st. When you've had a chance to examine the evidence, you will have every opportunity to ask those questions that remain unanswered, if there are any. That is all, thank you.

Above speech intercut with sequences showing what really happened.

Maybe person making announcement is shown in truth scenes to be responsible for coverup, part of army.
