

Skin Blood Recipe 02/04/05

All Measurements in Parts, By Volume.

- 1 Part Supercolor Cateineal food Colouring
- 2 Parts Supercolor Yellow food Colouring
- 4 Parts Phillips Milk of Magnesia liquid

[1 Part instant Coffee] Mix together before adding
[1/2 Part Boiling water] to other ingredients

Staining - Will stain skin if just wiped off (or will leave a stain, i should say) It should come off with hot water & washing up liquid. For stubborn areas like hand Palms you can use Vanish Powerspray - then wash or have a shower (try using Barrier Cream/Vaseline before applying to stop staining)

feathering - if skin is not bone dry it will feather out into the wrinkles of the skin

has strong vibrant colour, runs & beads like real blood.

fabrics - Even dried blood won't stain fabrics if washed at 60°C

taste - all ingredients are edible so its safe to have in your mouth, tastes of Minty coffee, with a coffee aftertaste - Not that bad really? will stain tongue / teeth though. Just toothbrush & water will clean it off teeth.

Sticky - it isn't and doesn't get sticky, just like water

time - when left in bottle over 1 1/2 hours the blood will separate into a dark liquid on top & a brighter red liquid below, one quick shake and the 2 are mixed again.
